Price	starting at $749	starting at $886	starting at $980	starting at $1055	starting at $1125
Frame/Sash material	PVC Vinyl	PVC Vinyl	PVC Vinyl	Composite window	PVC Vinyl
Description	Advanced vinyl window - sleek design	Advanced vinyl window - sleek design	Clutter free - hidden latches	Looks like a wood sash	Brand name - locally made
Structural Rating	DP 40	DP 45 - Light Commercial	DP 50 - Light Commercial	LCPG40-H	DP40 - optional DP50
Warranty	*Lifetime-Non Prorated-Transferrable*	*Lifetime-Non Prorated-Transferrable*	*Lifetime-Non Prorated-Transferrable*	*Lifetime-Non Prorated-Transferrable*	Lifetime frame 20yr glass prorated
Exterior Colors	White - beige	White - beige -painted/laminate ext	White - beige -painted/laminate ext	White - black	White - beige - painted
Interior Finishes	White - beige	white beige	White -beige	White - black	white or beige
Energy efficiency U Values(s)	U.28 to U.24	U.27 to U.20	U.27 to U.20	LE/Arg - U.27	U.29 to U.22
Key features	Multi-chamber - hollow frame	Fiberglass reinforced meeting rails	Fiberglass reinforced meeting rails	Composite sash looks like real wood	Harvey quality & reputation
	High performance glass spacer	High performance glass spacer	High performance glass spacer	Maintenance free	Middle grade
	Single strength glass	Fiberglass filled insulated frame	**Hurricane rated**	Available in black	
	(double strength optional)	SDL grid options	**Magnetic weatherstripping**	SDL grid options	other models available
		Double strength glass	Fiberglass filled insulated frame		Slimline & Tribute
			Hidden tilt latches		SDL grid options
			3 point wind/water protection		
			Double strength glass		
	Trimline DR 200	***Trimline EC200***	***Andersen 100***	***Andersen 400 Tilt/Wash***	***Andersen 400 Woodwrght***
Price	starting at $1435	starting at $1750	starting at $1300	starting at $1600	starting at $1850
Frame/Sash	Wood/Aluminum Clad exterior	Wood/Aluminum Clad exterior	Andersen Patented Fibrex	Wood int.(pine only)-painted exterior	Wood int.- Fibrex exterior
Description	Authentic original wood window	Upscale wood window	Unmatched Andersen Quality	Unmatched Andersen Quality	Unmatched Andersen Quality
Structural Rating	DP LC 45 light commercial	DP LC 45 light commercial	DP 50	Up to DP 50 dependng on options	Up to DP 50 dependng on options
Warranty	20 years glass/10 year frame	20 years glass/10 year frame	10 years - frame 20 years glass	10 years - frame 20 years glass	10 years - frame 20 years glass
Exterior Colors	6 colors	6 colors	5 colors	7 colors	7 colors
Interior Finishes	6 colors + custom color	6 colors + custom color	4 colors (no int terratone)	Unfinished wood or white painted	*Unfinished wood,or white painted*
Energy efficiency U Values	U.27	U.27	Many choices (No triple)	Tilt/wash system tilt assist pins	Tilt for cleaning
Key features	surface mounted tilt latches	internal tilt latches	maintenance free	Vnyl jambs	All wood jambs
	beige vinyl jambs	wood jambs	SDL grid options	Premium quality materials	Premium quality materials
	SDL grid options	SLD grid options		Thin sash design	Beefy sashes
				Fibrex sills & jambs - painted sashes	Sleek Internal tilt latches
				SDL grid options	Pine -maple - oak
					SDL grid options

Prices above are for a minumum of 6 windows. Smaller orders subject to minimum order charge. Quantities over 20 may be discounted.

All warranties above are for comparison only - Please refer to manufacturer's warranty policy for limitations. A copy can be provided upon request.

Please note - U Values and DP ratings are for comparison only and may change without notice due to building code changes and requirements in different municipalities.

Glossary Of Terms

PVC Poly Vinyl Chloride: This is the plastic compound used to make Vinyl windows. Ultraviolet inhibitors are added to prevent yellowing and extend the life expectancy.

Grade : This number is the "design pressure". It measures the structural integrity of the window. The higher the number the better the window is at resisting air & water infiltration in windy conditions.

U Value: This is the insulating quality of the window. The lower the number the better. " Energy Star" rated products must have a very low U Values by zone

Low E Glass: A coating applied to standard (clear) glass which reflects radiant heat and increases energy efficiency. This coating generally makes a window "Energy Star " rated according to EPA guidelines. Adds a slight tint to the window.

Argon Gas: Argon gas replaces the air between the hermetically sealed panes of glass and reduces conductive heat loss through the glass pack. It is used together with Low E glass to further improve the energy efficiency.

Double Strength Glass: 33% thicker than standard single strength glass. Better insulating and has better resistance to breakage.

Constant force balance and block & tackle balance: the latest in sash balance systems. Both offer superior life expectancy & smoother operation than the older style spiral balance.

Multi-chambered extrusions. By using multiple walls within the vinyl extrusions, this design has greater strength and better insulating properties.
